

flotation devices

personal flotation devices

The BOPPA™ is a new patented PFD offering excellent performance and wearing comfort in a simple design. The safest position to float in the water is on your back with the head held clear of the water. BOPPA™ provides the correct flotation to achieve this. A special feature is the uneven distribution of foam on the chest area which improves roll-over. This helps to turn the wearer onto their back should they fall in face first.

ITEM # 035, 040, 045

buoyancy aid for babies

Babies have special needs when it comes to PFDs. There must be no risk of slipping out. The PFD must provide support to the head and neck, and there must be a tendency to float on their back. Baby BOPPA™ meets these needs. The buckles fasten at the back and a booster panel is included for extra safety.

ITEM # 030, 031

life-jacket

The junior life-jacket is made with vinyl-coated AIREX™ foam, webbing and dual-adjust buckles. It is FULLY reversible, quick and easy to put on. Buoyancy is 50N (11lbs). Suitable for children weighing 20-40kg.

ITEM # 050

flotation cushions

A must for every boat! Provides 50N (11lbs) of buoyancy for emergency use and on-board comfort. This product has uses beyond the obvious water-safety application. It does not absorb water, gives excellent thermal insulation and is easy to carry making it ideal for sports spectators. Velcro™ webbing allows the 2 sections to be separated.

ITEM # 2161

For boating and yachting enthusiasts, this Department of Transport (South Africa) endorsed throwable cushion provides 100N (22lbs) of buoyancy. Ideal for emergency use and on-board comfort. Double-sided grab handles made with 5 ton webbing ensure that it withstands the most arduous of rescue situations. Made with AIREX™ foam.

ITEM # 2162

also available

Medical Products

Our vinyl coating applied to soft and flexible AIREX™ foam makes it ideal for medical products in cushioning, thermal insulation and hygienic applications. The picture indicates head blocks, leg splints and flotation gear for off-shore rescue. Products can be made to customer specifications.
