INTRODUCTION

SIMATION (Pty) Ltd specialises in Process Control Systems, PLC Automation and Drives training. **SIMATION** is committed to providing quality and excellence to the South African and Africa industry. The company provides a wide variety educational service. A dedicated staff of professional facilitators with many years experience will ensure quality results for our customers' investments through product training and 'On the Project Training'.

The **SIMATION** educational services are the most effective solutions for the customers' challenges, solving common problems such as:

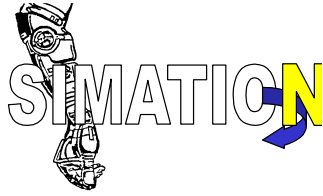

- ◆ **Expensive downtime;**
- ◆ **Staff turnover;**
- ◆ **Start-up deadlines;**

All **SIMATION** training courses and project concepts are aimed at giving our customer hands-on experience with automation systems as well as in-depth insight into their projects, putting the end-user in charge of his plant and his profits. This concept enables our customers to do their own back up and maintenance by not relying on a third party.

The **SIMATION** flexible training and projecting concepts leaves plenty room for our customer's individual requirements.

SIMATION'S presence in South Africa will permit its customers to gain quality guaranteed know-how anywhere in Africa.

Simation (Pty) Ltd is a Qualifying Small Enterprise (QSE) in terms of Black Economic Empowerment and Employment Equity.

'Africans training Africa'.

WHY SIMATION?

- ◆ **SIMATION** has a strong management team with many years experience.
- ◆ All our trainers are highly motivated and have firm practical experience and sound didactical knowledge.
- ◆ Regular 'Train the Trainer' sessions keep our trainers' knowledge up-to-date.
- ◆ All product and project training will be done on state-of-the-art training equipment and with effective didactical aids to ensure a high level of learning.
- ◆ Training is done anywhere in Africa on-site or at neutral venues.
- ◆ Customers receive high quality course material, which will greatly facilitate learning.
- ◆ Long and sort term training packages can be developed jointly with our customers to meet specific customer requirements.
- ◆ Simation has a personal approach to customers.
- ◆ We provide the highest level of quality training and service.
- ◆ The ability of our Training staff to adapt to the market and the needs of our customers due to their in-depth insight into the training business and the automation market in Africa.
