

Company Profile

Republic Transmissions SA (Pty) Ltd
Industrial Gearbox Designer and Manufacturers

Locally Produced, Globally Used

The RepTrans Story

Republic Transmissions was founded in 1979 by two engineers who recognized the need in the South African market for locally designed and manufactured industrial gearboxes. Gearboxes specifically designed for valves and dampers in the power generation, water, mining, pulp & paper, petrochemical, and process industries in the Southern African working environments. The robustness and adaptability of the gearboxes soon grew to process applications outside its borders.

42 years later Republic Transmissions has locally designed, manufactured, supplied and installed more than 40 000 gearboxes. Adaptors and associated equipment that are used in all flow industry sectors.

MISSION STATEMENT

- Achieve high-quality, total customer satisfaction
- Maintain and grow long-term client relationships by engaging in continuous communication
- Local manufacture to ensure quicker turn around time
- Support local industries for procurement and design technologies
- Provide high level of sales, after-sales and technical satisfaction
- Improve our services continuously with welcoming client engagements.

OUR VISION

- To become the leading industrial Gearbox and associated equipment manufacturer / supply Company.
- To be recognized as the only Gearbox supplier to adapt our designs for your process requirements.

OUR MISSION

- We at RepTrans are driven to provide the best value and expertise to our customers, grow a profitable business and continuously up skill to meet global demands.
- Our commitment strives to become a leader in the industry sector by providing quality workmanship, locally manufactured empowerment and a model of success from the South African market to the rest of the world.
- At RepTrans every gearbox is specifically designed and manufactured to exceed client expectations. This is achieved by employing highly qualified and trained personnel using the latest design, materials and manufacturing technologies.
- To train local artisans by way of manufacturing and engineering designs.
- Maintain continuous locally designed and manufactured products for decades to come.

Business Capacity & Product Supply

RepTrans currently offers a full range of OEM Industrial gearboxes to meet the demands of industries in all types of manufacturing and process environments.
