

**ADLER
TECHNOLOGIES**

SmartCabinet

ADLER Technologies (Pty) Ltd, is pleased to announce the arrival of our new RFID product, the **SmartCabinet**. This unique device operates as an independent asset management tool. The **Smart-Cabinet** authenticates users (to allow access) and assigns the removed assets to their name for accountability when issues arise regarding the asset. The system also provides full historical reporting on all asset movement transactions.

UHF RFID is used to scan the contents of the **SmartCabinet** continuously to monitor any changes in the asset count and also to scan for authenticated users requiring access when they approach the **SmartCabinet**.

A 12V DC Magnetic Lock is used to secure access to the **SmartCabinet**. When an authenticated user approaches the **SmartCabinet** the system verifies their access card and either allows or denies access to the **Smart-Cabinet**.

The **SmartCabinet** is driven by a management engine that boasts the following features:

- *1.8Ghz Processor with 2GB DDR3 Ram
- *500GB Hard Drive Storage Space
- *Internal power supply
- *UPS for continuous power management
- *8 Port network switch
- *4 fan high powered system cooling
- *SQL database and asset management software with reporting

The **SmartCabinet** is available in various sizes and finishes. Most popular models are the steel and wood finish **Smart-Cabinet's**.

The **SmartCabinet** can manage the following products and many more:

High Value Assets	Jewellery	Guns & Ammunition
Vehicle Car Keys & Documents (Dealerships)	Pharmaceuticals	Cell Phones
High Value Tools & Spares	High Value Consumables	High Value Electronic Products
Sensitive Dockets and Files (The systems can be setup in a cluster which will manage docs between branches)	Bank Documents (The systems can be setup in a cluster which will manage docs between branches)	Laptops and computer products
