

# ROMOLD LTD®

specialist manufacturers of polyethylene products

Bunded pallets are your first line of defense to stop and prevent spill or leaking liquids from contaminating the ground or water course. Oil chemicals and waste products all pose an environmental hazard if they leak or spill. **Spill Doctor's** range of bunded pallets and bunded flooring is the simple solution to contain the drums they are stored in.

- Pallet sumps comply with 110% of the single largest item or 25% of the combined total of items (whichever is the greater).
- No taps or drainage points to compromise the bunded area.
- Rotationally moulded polyethylene construction makes our products Robust, hard wearing and long lasting!
- Compatible with most liquids. Value for money.
  - 5 year guarantee.

## SPEAKMAN®

*Absolutely the best.*

**Spill Doctor** markets and distributes the full line of emergency showers, eyewashes and eye/face washes, manufactured by Speakman, that meet most applications. Speakman's unique features (including soft, aerated water spray and "impeller action" showerheads) provide superior protection from additional damage caused by exposure to hazardous materials. All Speakman Emergency Equipment products meet the latest ANSI Z358.1 performance requirements and all applicable plumbing, electric shock, safety and weatherability codes, including NEC compliance.

## SAFETY + OES

### PROTECT YOUR PIGGIES!

An alternate to safety shoes, especially in situations where temporary safety shoes may be required. SafetyToes have protective toe caps that slip over outer shoes. If risk assessments indicate the need for toe protection, due to the importance of workplace safety, these SafetyToe overshoes can provide complete compliance similar to safety toe shoes or boots.

They are available in sizes XXS (+/- UK3) to XXL (+/- UK13)

# SPILL DOCTOR SA

**SPILL DOCTOR** is a BBBEE level 4 South African company representing leading international brands in the field of environmental, health and safety. Formed in 2010, **Spill Doctor** distributes and markets a wide range of products specially designed for the storage and distribution of flammable and hazardous liquids and the prevention of environmental spills.

Our range of internationally compliant products will assist you in reducing the risk of fire, employee injury and environmental damage caused by incorrect storage of flammable and hazardous liquids. Our flammable cabinets, safety cans, plunger cans, oily waste cans, drum and dispensing equipment offers you FM Approval and an exclusive 10 year limited warranty. Our range of environmental products for spill control, spill containment and spill kits offer you compliance with local environmental regulations and a 5 year guarantee on Polyethylene products.

Unlike many of our competitors, **Spill Doctor** has a unique approach in providing our clients with Pro-active solutions designed to prevent losses (buildings or lives) rather than "reactive" solutions. We believe it is more important to look at the complete chain of processes within your company to ensure that every single link in the chain contributes to a safer working environment. Clients should not look at a single product as being their total safety solution.

**Spill Doctor** has the Head office in Durban, National Sales office in Cape Town and covers the whole of South Africa through our network of professional agents.

The World's Most Widely Trusted Safety Containment Systems

Spill Doctor's range of storage containers for flammable and hazardous liquids allow you to correctly store and dispense in a safe manner minimising the risk of fires. Our range includes:

- Flammable cabinets (for flammables, acids, corrosives)
- Safety cans (Type I and II)
- Plunger cans
- Oily waste cans
- Self extinguishing cigarette butt receptacles
- Dispensing equipment (safety faucets and drum vents)
- Rinse / Bench cans

Justrite is the leading source of storage, dispensing and handling products including fire prevention safety equipment for hazardous materials, environmental protection spill containment devices, and specialized storage products. All Justrite products have been stringently tested for unsurpassed quality and compliance to applicable codes and regulations. Only Justrite offers the most comprehensive line of safety cabinets and containers, backing the most popular models with an industry exclusive Ten-Year Limited Warranty.

Contact Spill Doctor for a FREE WORKPLACE ASSESSMENT

Are you looking at removing and replacing hazardous liquids (such as Acetone) from your factory or workplace?

SpillAway International Ltd are the leading manufacturer of diverse bio-remedial and bio-based products for hydrocarbon and organic waste solutions to the industrial, food processing, marine and land remediation sectors.

Having harnessed the innovative technology of bioremediation, SpillAway are able to offer comprehensive solutions to all hydrocarbon and organic contaminated land on site and with the minimum of interruption.

All products within the SpillAway range are:

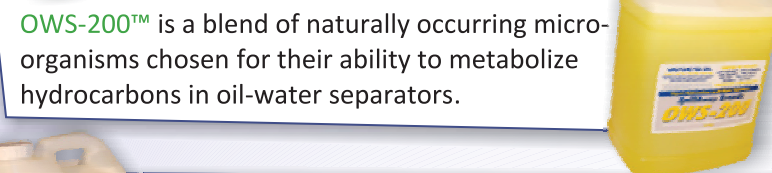

- non-chemical based
- pH neutral
- non-toxic
- non-hazardous
- non-caustic
- non-corrosive
- non-flammable
- safe to use
- readily biodegradable
- made from 100% naturally occurring and renewable sources

The microbes used within the products will literally "eat" hydrocarbon and organic waste, allowing for the total degradation of hydrocarbons in soil and groundwater within 60 days.

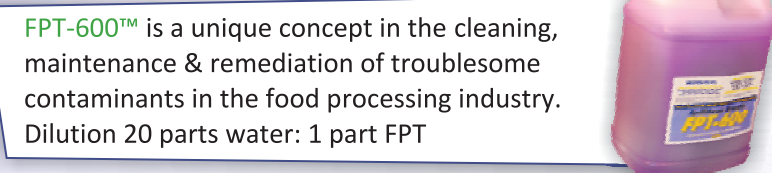

FleetKleen™ is a new concept in the cleaning and degreasing of most solid surfaces. Minimum dilution rate: 20 parts water : 1 part FK

OWS-200™ is a blend of naturally occurring micro-organisms chosen for their ability to metabolize hydrocarbons in oil-water separators.

Liquid Remediate™ is designed to solve soil & water hydrocarbon contamination problems through its high concentration of live synergistic bacteria. Dilution: 10 parts water: 1 part LR

FPT-600™ is a unique concept in the cleaning, maintenance & remediation of troublesome contaminants in the food processing industry. Dilution 20 parts water: 1 part FPT

SpillAway's JackHammer range of 100% Bio-based Products are designed to replace your current petroleum based products. All of its components are 100% Biodegradable & renewable from natural resources. It is a natural, safe & effective alternative to your current solvent system.

JackHammer PaintKleer AS™ is a new class of "BioBased" solvent designed soften, dissolve and remove most types of paint from most surfaces. It is a natural and safe, effective alternative to petroleum solvents and other hazardous and polluting chemicals.

## EMPTEEZY

working for the environment

Choosing the right absorbents and spill kits is only the start of the process. You need your staff to know how to use them safely and properly which will result in cost effective use. Spill Doctor offers help and guidance on which spill kits is suitable for your requirements and how to use them. We customise spill kits to your requirements and offer Free Spill Kit Training to ensure the safe and effective use of spill kits. The absorbency performance figures are based on evaluation using BS 7959. Contact Spill Doctor for a free assessment of your Spill Kit requirements.
