

D.S.K. CONSULTING CC

COMPANY PROFILE

CK 2009/181775/23

YOUR PARTNER IN HEALTH AND SAFETY

INTRODUCTION

D.S.K. Consulting cc is a health and safety consultancy that focuses on delivering a holistic but realistic safety infrastructure to companies saving them time, production and losses. We at D.S.K. Consulting are totally dedicated to the fact that that it is a fundamental right of every worker to be able to return home after a working day, alive and healthy in the same physical condition that he/she commenced on that same working day. It is also our goal to save employers time and money wasted on relatively unnecessary accidents that could be avoided initially, hence investing in the economy of our country.

D.S.K. CONSULTING CC OFFERS:

- HIRA (Baseline and issue based risk assessments)
- Risk Management
- Health and Safety audits
- Development of Health and Safety plans and Implementation thereof.
- Development of controls (JSA's SOP's, MSDS)
- Compiling of health and safety files for all sectors
- Occupational Exposure Limits. (OEL)
- Medical Surveillance.
- Environmental Management Systems

TRAINING

We believe in maximizing the full potential of every individual in your company.
We offer:

- Health and Safety Representatives
- Basic Fire Technology
- Safety, Health and Environmental Representatives
- Introduction to HIRA

Training empowers people in the workplace and improves productivity. We provide customized training interventions both on site and at the work premises. We will tailor make the Safety Quality Systems to suit the needs of your company so it complies

with legislature as per Department of Labour.

MISSION STATEMENT

Health and Safety at work are legal requirements and a criminal offence if neglected. D.S.K. Consulting can implement and manage compliance with the Occupational Health and Safety Act (OSHACT # 85 of 1993)and National Environmental Management Act (NEMA)

The Act demands a healthy and safe working environment. Safety is a discipline and if applied consistently, will spill over and positively influence other criteria such as quality, productivity, loss control, punctuality, ownership, housekeeping and high standards of workmanship.

An effective safety program will improve the image of the company and promote business.
