August 2013

To whom it may concern

Our Company:

We are an Automotive Leather Interior Company.

Our factory and fitment center is situated in Hennospark in Centurion.

We take pride in our craftsmanship. We provide you with the highest quality Leather seat covers and interior trims for the Automotive Industry. Our staff is highly trained and has been in the Automotive Leather Industry for years. Their experience in this trade is phenomenal.

Our procedure:

We only remove the seats (and Door panels) from your premises and refit them within 2-5 days.

There are thus: No extra mileage on your vehicles or expensive fuel costs

: No risk of damage due to accidents or stone chips

: The vehicle remains on your premises for other fitments e.g. window tinting to be done

The Process:

The original cloth covers are removed and the new leather covers are fitted according to the requirements of the customer. Door panels are also covered in leather according to the customers specifications.

A Durkopp Adler seat side-airbag machine ensures correct airbag seam sewing and complete barcode traceability in the event of a car accident.

We do embroidery of ANY Logo on to the front seats of any vehicle at an additional cost of R250-00 per seat.

Our offer to you:

-Dedicated staff with the finest service and work.

-Only the highest quality leather. No vinyl is used.

-A 3 year warranty on the leather and the stitching due to manufacturing faults.

Hope to hear from you soon

Regards
Dennis Cane
