Our Company

Sleep Active.co.za was officially founded in 2003, and is a South African based company that proudly manufactures all of our products in South African climate controlled rooms to ensure that your product performs at it's best.

Comfort Clinic Fourways was one of the first two official retailers of Sleep Active.co.za, originally opened by the founding owners of Sleep Active.co.za. As the years passed we have invested countless hours in doing research and working alongside medical practitioners nation wide, this means that when you enter Comfort Clinic Fourways you can find comfort in knowing that the person assisting you understands and can accomodate to your specific needs.

With the first Sleep Active.co.za opening in 2006 we realized that the general public was purchasing beds and mattresses on a price basis and that comfort and the human body did not play a major part in the mattress market and in the sale of the mattress. We have since then strived to create more awareness around the fact that mattresses and beds are more than just furniture, a good sleeping routine WILL improve the quality of your life.

We know that the average person spends a third of their life sleeping and that the sleeping surface used plays a big role in the quality of sleep. We have since been focussed on creating awareness within the bedding industry and would like our customers to be educated on their sleep and the importance of sleep.

We believe in "No Compromise" thus when you speak to a consultant you will notice that we are dedicated to manufacturing the finest quality mattresses through Sleep Active.co.za who uses expert craftsmanship, innovative design and the finest materials available on the market. We also aim to work with the best medical professionals available and seek advice on our products from the medical industry.

Our goal is to provide you with the ultimate in mattress comfort and support resulting in the most satisfying and restorative sleep possible.

Sleep Active.co.za and Comfort Clinic Fourways does a lot of research on the basics of Memory Foam, the benefits of Memory Foam and also the best way to use your Memory Foam products. in 2012 we wish to expand our in-store product range to provide you with the best possible "healthy lifestyle" choices available on the market today.

Best Regards
Annabel Greeff
