

TM TOWN PLANNING CONSULTANTS COMPANY PROFILE

CONSULTANCY SERVICES:

TM Town Planning Consultants provides a range of services to facilitate satisfactory outcomes for individuals, developers and other consultants when liaising with consent authorities in the South Africa.

Our Services include:

- ◆ Development Applications preparation, co-ordination, lodgement and pre determination management.
- ◆ Development feasibility, site investigations and analysis to ascertain the permissibility of land use or development types, carried out with due diligence.
- ◆ Strategic planning submissions for rezoning proposals.
- ◆ Preparation of statement of Environmental Effects for numerous development types— Subdivisions, Dual Occupancy, Medium density, Residential Flats Buildings, Township Establishments and other land uses or existing uses, ensuring that complete and detailed applications are submitted for assessment.

Much work is now carried out using information technology resources to encourage electronic lodgement, and rapid receipt of communications between the consultant and client, and the consent authority.

TM Town Planning Consultants can put you in contact with other professionals who work in the development field, particularly in the Gauteng region, including Land Surveyors, Architects, Civil and Structural Engineers.

Our Vision:

We believe that the company vision should be enshrined in our day-to-day activities through a set of core values. The vision shared by TM Town Planning Consultants is to build sustainable partnerships with our clients by offering best practice, cost effective and appropriate solutions through the integration of development and planning, information technology and information management skills and the application of world class technology adopted for local circumstances.

Our Mission:

Our mission is to provide innovative, strategic and commercially minded town planning advice and services, which deliver the highest value outcomes for clients.

Our Value: Commitment to client Outcomes, Trustworthiness, Technical Excellence
