

Why do you want to learn to trade the Forex Market?

Diversify your investment portfolio?

Learn to control your capital?

Increase personal income?

Establish your second profession?

Obtain a life long skill?

Become a full time forex trader?

Regardless of your background, experience or motivation to learn how to trade, we can work with you and provide you with training, mentoring and support from day one. All of our lecturers and mentors are successful traders with different insights and methods for trading the Forex market.

Whatever you need, our team is here to help you!

“Think carefully about your future, because that’s where you’ll spend the rest of your life”

Once you get started you’ll see that trading is not as difficult as it may seem at the start and not as complicated as some may want you to think it is.

- Trading is a skill like any other.
- If you’ve learned how to drive a car,
- If you learn how to cook a meal,
- If you know how to get to and from your home to your job,

YOU CAN LEARN HOW TO TRADE!

IT’S A MATTER OF DEVELOPING SOME RULES AND STICKING TO THEM LIKE YOU DO WITH OTHER DAILY TASKS

TRAINING OUTLINE

- Lack of proper training
- No Proven Trading Plan
- Failure to follow risk management procedure
- Lack of an ongoing support system

With International FX Trading's 4-day Intensive Training Course we created a system that will eliminate these four barriers so that you have the best chance of being a consistent profitable trader.

While most firms would consider your trading education as complete after the initial course – and in some cases expect you to be instantly profitable, International FX Trading goes the extra step. We offer continuing support by the use of our innovative Member Zone and Trade Signal Platform, where you will have continuous tutoring and support. International FX Trading is committed to providing you trading education without the hype that is so often abundant at trading seminars.

You will learn how to:

Find precise entry and exit points

Learn advanced institutional level patterns

Identify market environments and what tools to use for any environment

Gain access to more than 15 years of proprietary information

Apply rule-based proprietary strategies

Use advanced money management tools

Develop your own trading plan

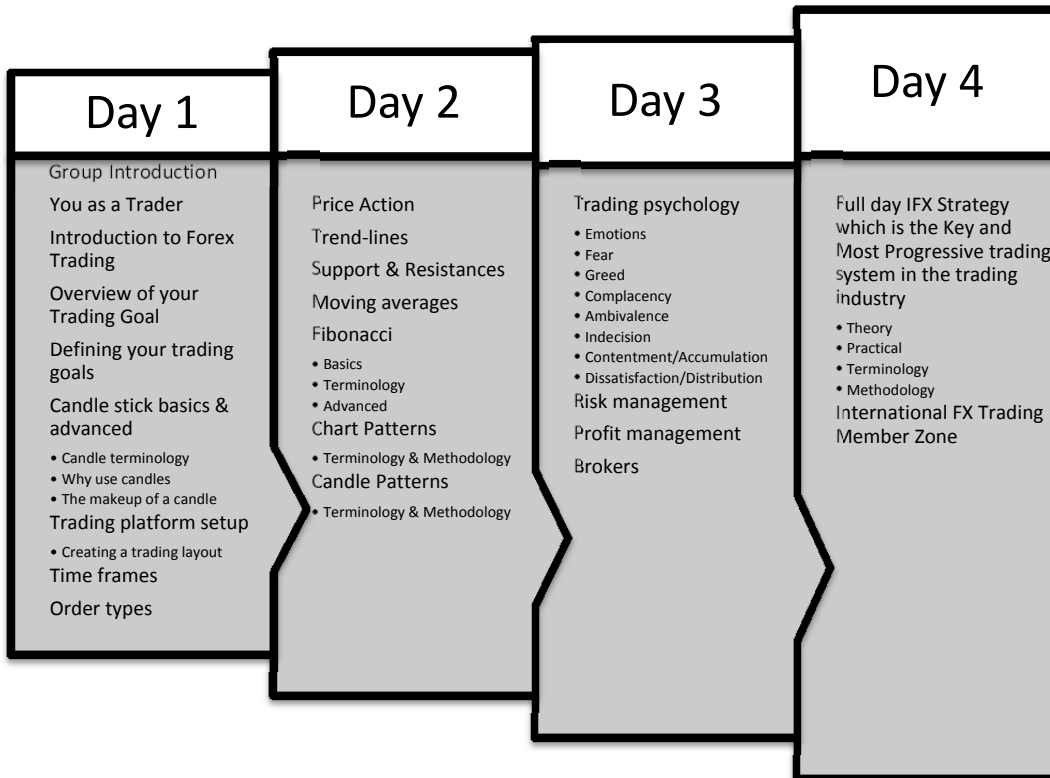

And much more...

HOW OUR PROGRAM WORKS

First we offer intensive training consisting of four 8 hour sessions. There will be a strong emphasis on **HOMEWORK**, **BACKTESTING** and **TRADING PSYCHOLOGY**

**FOLLOWED UP WITH DAILY
TERACTION WITHIN OUR
USTOMISED MEMBER
PLATFORM**
