About us

Gaafele TS. Consulting is a professional micro-enterprise, operating on a consultative basis to provide Business Process Intelligence expertise to various organisations in the Services Industry with core experience in the Financial Services Sector. The company is based in Johannesburg, Gauteng yet it's operational throughout South Africa.

Through the application of global best practice principles, we help organisations to achieve operational efficiencies and sustainable business effectiveness, aligned to strategic goals.

The desired performance excellence is achieved through the existing process engineering, business analysis, project and people change management skills that give our organisation its uniqueness.

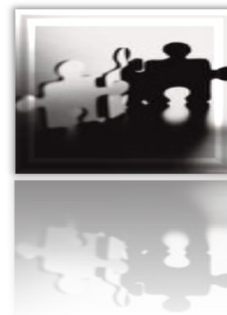

Our Vision

is to be recognised as a brand that offers efficient and effective business optimisation solutions that are uniquely designed for easy customisation and implemented for sustainable business benefit

Our Mission

is to empower our clients to function at optimal operational levels in achievement of their strategic goals through the application of best practice principles, by providing them with effective and sustainable business process intelligent solutions.

Since time is money, our core passion is ensuring that we deliver optimal business improvement results in a brief period, that will however benefit the business in the long-term.

We focus on operational challenges and drive improvements in alignment to strategic business objectives. Through this approach, we provide sustainable economic and qualitative value-add whilst also reducing costs through our efficient end-to-end analysis of the business in line with the balanced scorecard.

Driving sustainable business efficiencies through process intelligence

"By concentrating our efforts upon a few major goals, our efficiency soars, our projects are completed, we are going somewhere."

- Michael Korda
