Permanent make-up training and procedures.

Skin Needling, Melanocyte Restoration & Scar Relaxation course For Permanent Makeup Artist

This groundbreaking course provides in-depth instruction in Skin and Facial Needling, Melanocyte Restoration and Scar Relaxation.

Facial Needling is the process of inserting a sterile needle grouping into the epidermal layer of tissue to create a wound. The induced trauma signals the brain to send collagen to the injured site to repair it, creating an abundance of collagen. This, in turn, plumps up the injured area, creating a soft and subtle appearance and diminishing fine lines and wrinkles. You can help your clients turn back the hands of time by learning this procedure

Melanocyte Restoration is a process that uses a technique similar to that used in Skin Needling™. With no pigment involved, the technician uses his or her needle to repeatedly pierce the skin in areas with hypo-pigmentation to stimulate the melanocyte cells in the epidermis, which in turn produce melanin. Learn to use this process to help the treated discolored areas to blend in with the rest of the patient's skin.

Scar Relaxation for contracted tissue helps those whose movements are restricted due to severe scarring. Learn to use the proper techniques for releasing the fibrous bands of scar tissue and increasing the range of motion and maneuverability of the patient's scarred area.

Learn quick, easy, effective tips on how to work with physicians and other medical professionals! We'll show you exactly what you need to be aware of when you start working on a commission basis versus room rent.

This class will teach you how use the proper techniques to reactivate the skin's melanocytes in hypopigmented areas to help the skin return to it's normal and natural coloration.

If doing the full Needling course you will receive:

1 x Rotary machine

1 x Power supply

1 x foot switch

20 x needles

20 x needle tips

2 x Before procedure anesthetic

1 x during procedure anesthetic

5 x pkt Cotton swob's

1 x Pkt Ear buds

1 x aqueous cream

1 x container for aqueous cream

1 x Manual

1 x Container for Kit

certificate on completion of course

You will need a digital camera to record your procedures. Everything else will be provided.
