# COMPANY PROFILE

# COMPANY OVERVIEW:

- Company Directors: Denise Preston & Bennie Kruger
- In operation since July 2012
- We bought a SA Argus 1060 laser cutting & engraving machine. It boasts a working area of 600mm x 1000mm.
- Lasers have now been used in the making of signage and similar products for over 20 years! In that time frame, many changes have occurred, but one thing remains constant: sign makers & other professionals are finding more & more reasons to use laser technology for providing quality products & services for their customers.
- Laser cutting machines runs 5 times the speed of a CNC machine, as well as giving a beautifully finished edge with perfect accuracy & very intricate detail, where required.
- With a laser-engraving machine, we are able to offer a wide variety of products.

# POSSIBLE BUSINESS USES INCLUDE:

- **LABELLING & MARKING:**
- Typically produced using anodized aluminium or engravers plastic, control panels can be engraved at high precision. Customize each control panel, create once off designs or mass produce the panels.

# PERSONALIZED CORPORATE GIFTS:

- Corporate gifts are ordered by companies who want to reward their customers or for major promotions or as a thank-you to every staff member after a large account is secured. Corporate gifts range from glasses, wine bottles, wine boxes, pens, key rings to diaries etc.
- Product specialization, customization & fast lead times are the key words of the corporate gift market.
- We can ensure that you deliver a fast, reliable service, offering unique customized products.

# RUBBER STAMPS:

- Rubber can be engraved to create rubber stamps for decorative, business or personal use.
- Because rubber is thick, stiff material, getting a defined cut can be difficult with standard tools. Our laser machine employs a moving laser head to vaporize a programmed design into rubber. This leaves a clean, very sharp engraving for consistent & legible stamping.

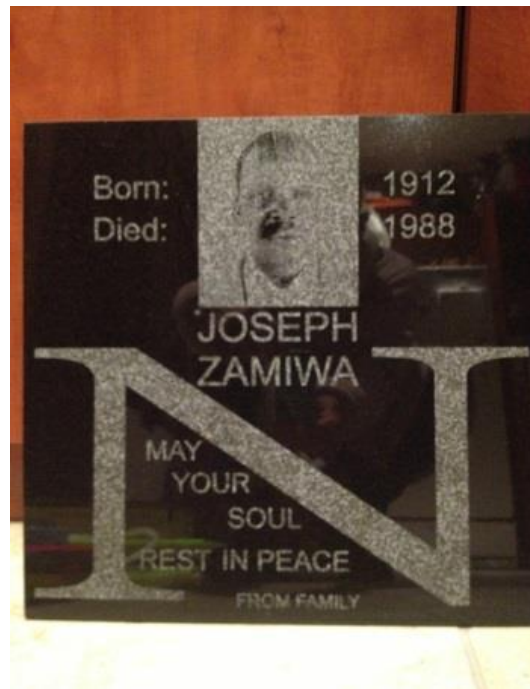

# WEDDING & EVENTS:

- There is no doubt that laser cut are one of the most elegant 2013 wedding trends...
- Intricate designs with an attention to detail is made possible with a laser machine
- From invitations, place cards, favour boxes to custom made event décor, engraving on wine glasses & bottles and even wedding dresses.

# PHOTO ENGRAVING:

- They say a picture is worth a thousand words.
- That is especially true when the picture is engraved onto a unique gift item such a decorative photo plate or even tombstone.

# ENGRAVING ON LEATHER:

# MODELBUILDING:

- Our laser machine is perfect for the manufacturing of models as both extremely fine contours as well as delicate lacework can be cut & engraved.

# WOODWORKING:

- With our laser machine we can quickly & economically cut intricate designs that are too complex for creating by hand, cut smooth curves and even engrave.
- Think custom made kitchen cabinet doors, wall art and other interior products such as room dividers .

# OUR MACHINE IN ACTION:

THANK YOU FOR GIVING US THE  
OPPORTUNITY TO GIVE YOU INSIGHT  
INTO OUR BUSINESS!

REMEMBER:

YOUR IMAGINATION  
IS OUR CREATION!!!
