INTRODUCTION TO INVERDOORN

Inverdoorn Game Lodge & Safari's **ten thousand hectares** dedicated to conservation contains over **1200 wild animals representing 28 different species** and hundreds of species of birdlife. Of all the Cape private reserves this close to the Mother City, only Inverdoorn offers such **a wide variety of free roaming** species living in large family herds. The reserve runs a Cheetah Rehabilitation Program on site open for overnight visitors to explore and visit. We understand that visiting an African Safari is a once off opportunity, so our safaris are specifically set up for visitors to get maximum first-hand African wild animal interaction.

Visitors can track animals on **3-hour game drives** in our specifically designed Land Rover 4x4 game viewing vehicles with rangers on hand to help you find the animals and provide accurate, up-to-date information of flora and fauna. Guests can **step close to wild animals such as giraffes on our guided walks** with expert trackers during safaris, and overnight guests can watch the animals drink, eat and play at our many observation posts situated strategically inside the reserve high up out of danger's way!

Inverdoorn is committed to providing visitors with maximum exposure and information to our huge number of wild animals and birdlife.
