ABOUT US

Therm Tech South Africa (PTY) Ltd. was established in 2011 by Roelof de Wet after 13 years of experience in the combustion industry, after a specific need was identified for taylor-made combustion solutions and expertise.

Through our extensive knowledge base background, experience and highly satisfied customers, we've assisted the industry continuously to successfully develop new processes.

Our main Focus is to provide our clients with state of the art technology, for Safer more effective and more environmental friendly thermal machinery. We are constantly researching for products, that can enhance the performance of thermal equipment.

Our clients benefit from our prestige experience, process knowledge, installation assistance, commissioning, 24 hour rapid service availability and after market support.

We are proud service providers to Applied Heat (Dty) Ltd. The leading manufacturer, of thermal heating equipment and steam generators in Africa.

We proudly serve to following industries:

- Mining Industry
- Aviation Industry
- Chemical Processing
- Food and Beverage
- Agricultural
- Recycling Industry
- Chemical Engineering
- Motor Industry
- Road Industry
- Petro Chemical
- Textile Industry
- Die cast Industry
- Powder Coating
- Web and gravure printing
- And many more

Last but not least, WE ARE PROUDLY SOUTH AFRICAN !!!

Our Vision

To become the most innovative combustion specialists in the industry.

Our Mission

To Provide customers with the most advanced and reliable products on the market, having zero tolerance for unsafe operational practice, manage, implement and integrate improvement projects with competent personnel.
