fencing is our business since 1947

Securi-Vue The most complete product on the market (beauty, strength and security)

Securi-Vue has been specially designed by engineers to ensure protection for industrial sites, local authorities, prisons and high risk zones. **Securi-Vue** is the ideal delaying element against any attempt at intruding, escaping and even terrorist attacks.

INDUSTRY

PUBLIC SERVICES

PRISONS

MILITARY

SPORT FACILITIES

MINING

RESIDENTIAL

Wide Range

A variety of sheet thicknesses and heights.
A variety of hole apertures

Suitable for uneven ground

Due to the narrow panel sizes contours are closely followed with little to no gap between ground and barrier.

Ease of assembly

All units are bolted together, no cutting or welding is required

Efficiency of repair

Cost effective to repair as only the smaller section needs to be remade and replaced.
Faster repair time than larger panelling systems.

More efficient and cost effective transportation to site due to ease of handling smaller load requirements.

Tamper resistant

Provides seamless finish and little to no place for would be intruders to tamper with the product.

The mesh is so small not allowing a spanner or cutter to access the fastening system.

Shear nuts are used as part of the fastening system so once installed properly tampering is almost impossible.

The aperture of the holes and formation of the mesh make it one of the most cut resistant products on the market today.

Anti climb

The mesh is so small that no foot hold is possible.

Life span

Two options are available fully galvanised and either Black or Green powder coating.

Particularly well adapted for industrial and marine environments.

SABS specified coating.

Visibility

A clear Vue adds to the appeal and security of the finished product.

The product has the ability of increasing the value of the property due to its clean lines and see through finish.

Anti burrow

Specially coated mesh can be placed below the ground to discourage burrowing under the fence.
