Quality in Design

The concept of quality is a well-known design principle, quality has a long-lasting foundation. All the designs of Anchor Surveys are based on the principle of experience and quality, that will provide a solid footing for the site builds, regardless of size. Quality is the influence that will drive accurate and detailed designs for the fibre optic industry.

Operations:

We are a West Rand based company, travelling to sites within the greater Gauteng area. Should the sites be outside Gauteng or in a different province, travel and survey of the sites can be planned accordingly.
