RE: INTRODUCTION TO ANCHOR SURVEYS (PTY) LTD

To Whom It May Concern,

It is with great enthusiasm that I would like to introduce to you the freelance services of Anchor Surveys – Fibre Optic consulting and design.

Many of you may know me as a client, or I have had the privilege of working with you in the past. With more than 15 years' experience working with fibre optics, as well as a Masters qualification in business, I have started my own company offering my skills, experience and technical knowledge to the Fibre Optic Industry.

My services include but are not limited to surveying, design and consultation for Fibre Optic installations in and around South Africa.

I would appreciate the opportunity to work with you again, should you require any of the above services. I have attached my business profile.

Please feel free to contact me on any one of my contact details so that we can discuss any business opportunities further.

Wishing the remainder of your business year to be a successful and prosperous one.

Yours sincerely,

Wesley Otto
Director
Anchor Surveys (Pty) Ltd
