RECOVERI DOT™ MICRODOT SOLUTION

Recoveri microdot is a product used to discretely label assets so as to identify and trace ownership. This is linked to the Recoveri Asset Database that provides the central record of all information linked to each unique Asset Identification Number (AIN).

COMBAT CRIME

"The only technology that truly assists in combating and the investigation of crime"

South African Police Service

MICRODOT YOUR ASSETS

Benefit today from South Africa's premier microdot technology solution designed to be applied inconspicuously across valuable moveable assets such as jewellery, art, office equipment, computers, furniture, bicycles, tools and vehicles.

MOTOR VEHICLES

Microdot tagging of vehicles has already been legislated in South Africa. Registered and Accredited Recoveri fitment centres apply 15,000 microdots per vehicle using proprietary resin and applicators for best results. The microdot and vehicle information is then linked to the national vehicle register (eNaTis).

HOUSEHOLD & CORPORATE ASSETS

Between 500 – 3,000 microdots can be applied to a wide range of moveable assets and linked to a secure online asset register. This solution is available in a convenient DIY kit designed for home, company and security use.

RECOVERI

TAG WHAT'S YOURS

RECOVERI DOT™ MICRODOT SOLUTION

- Secure application of virtually undetectable microdots with environmentally friendly resin that is detectable under UV light.
- Tagging of motor vehicles – 15,000 microdots per vehicle each with a unique Asset Identification Number (AIN) and fitted by an accredited Recoveri fitment centre.
- Tagging of personal or company assets with packs of 500 – 3,000 microdots. Each convenient DIY pack contains a unique set of AIN microdots.
- **FREE** access to our secure online web-based database to administer and maintain your asset register.
- TUV ISO accreditation for quality assurance, reliability and dependability.

BENEFITS TO YOU

- A cost effective and dependable asset tagging solution.
- Technology has been proven by SAPS to reduce theft.
- Undisputed proof that the tagged asset belongs to you.
- In the event of the asset being stolen the HOT DOT number is circulated to law enforcement.
- Insurance discounts apply with some insurers.
- Tagging assets improves the chances of getting stolen assets back after a robbery.
- The solution proactively prevents theft of your assets as criminals find it difficult to sell tagged assets - this serves as an effective deterrent to crime.
- Enjoy convenient and password protected secure control over your assets on our encrypted secure database at www.recoveri.net.
- Easily identify whether tagged assets are stolen on our website 24/7 before purchasing.

The South African Police Service (SAPS) have direct access to our database to determine ownership and status of tagged assets found at crime prevention raids.
