INTRODUCTION

Since 1979, Libra has been keeping South Africans in their bath for just that little bit longer. Since its humble beginnings in Cape Town, and subsequent move to its world-class factory in Johannesburg, Libra has become a premier manufacturer and a leading supplier of acrylic baths and spas in Africa. In 2014 Libra went into a global cooperation with Grohe and the Lixil Water Technology Group, a globally leading supplier of sanitary and home improvement solutions.

Our team of research and development experts continue to innovate and push the concept of bathroom decadence. A comprehensive and stylish range provides the best solution for any need. Libra is a brand that exports worldwide so it is aligned with global trends and international quality and design standards.

THE LIBRA EXPERIENCE

It's the steam curling. Bubbles lathering. Immersing yourself in an ergonomically comfortable bath. Covering your entire body in warm water. Finding that moment of total serenity. In a Libra bath becomes a relaxing ritual.

Each Libra bath is manufactured with the utmost attention to detail and is imbued with a true understanding of the function of each bath it produces. Every Libra bath evokes the most enjoyable experience in the mind of its user.

QUALITY GUARANTEE

Libra baths pass through a vigorous quality check at the factory before being dispatched to our customers. This lets us confidently give customers a 10-year guarantee on all Libra baths, against any manufacturing fault provided the bath has been correctly installed.

ACRYLIC LINING

All Libra baths are made from premium, sanitary grade, cast acrylic which allows for the manufacture of unique, seamless designs and premium finishes with uncompromised quality and benefits. All Libra baths are non-slip, able to withstand high water temperatures and retain water heat for longer so you get to enjoy a safer, longer bath in a Libra bath.

WORLD-CLASS TECHNOLOGY

Libra is the only manufacturer in Southern Africa equipped with auto-clamping stretch and free-standing moulding machines. Reverse moulding is crucial in making our free-standing bath surrounds in pure acrylic and maintaining high-tech, accurate moulding.

CLEAN & HYGIENIC

Acrylic and manufacturing vacuum form processes ensure an impervious, non-porous lining that's resistant to common household chemicals. It's easy to clean and retains the high-gloss, smooth finish of our baths for longer.

LIBRA GREEN

The Libra factory uses intelligent, sustainable initiatives, ensuring that every bath, from the materials to the manufacture process, has been guided by strict ecological and economical requirements and created using the least environmentally impactful methods. This, coupled with a considered design, brings water conservation to the home. This all forms part of Libra's aim at reducing CO2 emissions and the drive of "LIBRA GREEN".

ARMOUR STRENGTH

The underside of each bath is strengthened with a multi-layer of specially formulated resin mix called Libra Armour Coat. This provides robust, long-lasting strength in each product.

5-STAR SERVICE

Service teams are located throughout Southern Africa and are able to provide assistance. This ensures a quick reaction time to any post-production concerns you may have. They also provide installer training.

EXCLUSIVE DESIGN

Libra's in-house innovative development teams manufacture specific and exclusive designs for a particular customer or market. These are made to the same world-class standard expected from every Libra bath.

BATH CARE

100% acrylic bath lining with no multi-layer extruded process allows minor scratches to be polished out.

INTERNATIONAL STANDARDS

Libra exports worldwide, giving you peace of mind that all Libra baths are made to the international EN198 standard - the recognised, premier bath standard.

ARTISANAL MEETS MODERN FORM AND FUNCTION.

“

At the heart of Libra
is artisanal manufacturing.

”

Every single Libra bath and spa has been carefully hand-crafted by skilled artisans, guided by a philosophy that strives to deliver creative and functional excellence. The attention to detail and care given to every piece is unmistakable. A Libra bath goes beyond the aesthetic, providing its customer with an effortless and elegant bathing experience. At the heart of Libra is artisanal manufacturing, the perfect marriage between technological innovation, manufacturing traditions and artisanal workmanship.

A white, freestanding bathtub is the central focus, supported by a dark, modern pedestal. The tub is set in a bathroom with dark wood-look flooring, a dark wall, and a stone-look backsplash. A chrome faucet is mounted on a dark wall panel behind the tub. To the right, a black side table holds a vase with green reeds, a soap dish with a bar of soap, and a bottle of liquid soap. The text "FREE STANDING BATHS" is overlaid in white on the side of the tub.

FREE STANDING BATHS
