SMOKE VENTILATION SYSTEMS

Servicing and installation of the following

- pneumatic smoke ventilation systems
- Electromechanical ventilation systems
- Fusible link ventilation systems

INTRUSION SYSTEMS

Physical intrusion systems are put in place to deter would be criminals from gaining access to property or valuables, these systems are capable of sending alarm notifications to security companies.

ELECTRIC FENCING AND PERIMETER PROTECTION

Electric fencing is the first barrier between your and an intruder, it is vitally important that the system is installed correctly, book an appointment with us now for any repairs or new installations.

An electric fence connected up to an alarm panel with armed response services has proved to be the most effective monitoring system as the armed response company is notified of any potential criminal activity before the would-be criminals even gain access to your property

SURVEILLANCE SYSTEMS

With technology continuously changing, Surveillance systems have become more than just a recording device to protect your assets. You are now able to download apps onto your smart phone that allows you to keep an eye on anything, from a Nanny cam to your furry friends, a camera over the pool. More advanced analytical cameras allow you to track items, provide number plate and facial recognition that can also be set up to allow access to certain locked areas without the need for keys

ACCESS CONTROLL

Access control restricts unauthorized access into buildings or areas of a building by means of a simple lock and key to high tech bio-metric devices that are able to provide you with detailed reports.

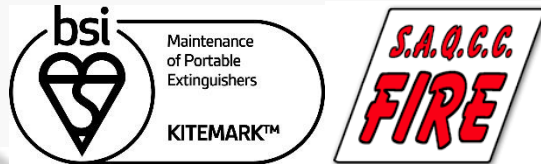

HOME AND BUSINESS AUTOMATION

Automation has given us the ability to control access into properties or garages without the need to climb out your car to unlock and open a gate or garage, putting yourself in potential danger.

The diverse range of solutions and services in our portfolio enables us to keep up with the ever-changing demands of the various markets we serve.
