# Executive Summary

## Business Description

Global Creation with registration number 2019/605462/07 was found by Mr. Letlhogonolo Phillip Rantlhwatlhwa appointed as the Chief Executive Officer and Mr. Modise Bongane Jacob Matjila appointed as the Chief Operating Officer.

Global Creation with registration number 2019/605462/07, was established with the vision and aim to bring different stake holders in one accord by bringing all the necessary specialist to assist small, medium and larger firms grow and sustained under any difficulty of the global economy, also assist investors to carefully choose economical projects/businesses in order to generate future economic benefits also evaluating the future economic costs, to sustain growth of different investments.

## Management

### CONTRACT AND PROJECT MANAGER

**Mr. Namanyenu Sheleni Mukosa**, was absolved by our company as one of our key specialist in contract and project management, standing as an agent call out for any project that our company is awarded by clients.

### **Educational Background:**

Masters in Science: Mechanical Engineering - 2008, University of KwaZulu Natal.

BTech: Mechanical Engineering – 2003, Durban University of Technology (formerly Durban Institute of Technology).

National Diploma in Mechanical Engineering - 2002, Durban University of Technology (formerly Durban Institute of Technology).

### **Field Experience:**

▪ BOSCH PROJECTS: MARAGRA 230THC FACTORY EXPANSION (MANUFACTURE OF KESTENER LONG TUBE EVAPORATOR, ROBERTS SHORT TUBE EVAPORATOR, CONTINUOUS VACCUM PAN AND VERTICAL CRYSTALLISER) TO 300THC

Position Assistant Project Manager (FIDIC), Design Engineer for Mechanical contract

Duration March 2008-February 2009, Project Value R22 000 000.00

▪ BOSCH PROJECTS: MARAGRA 230THC FACTORY EXPANSION TO 300THC Position Contract and Deputy Construction Manager  
Duration February 2009- April 2010, Project Value R300 000 000.00

▪ BOSCH PROJECTS: "C" MASSECUITE REHEATER UBOMBO SUGAR LTD, 410 TO 500TCH FACTORY EXPANSION, COGENERATION AND OFFCROP REFINING PROJECT 185/133

Position Contract Manager and LEAD Discipline Engineer

Duration April 2010 to- March 2011, Project Value R15 000 000.00

### Mission Statement

Global creation is dedicated to delivering effective, efficient, respectful services with integrity and accountability using both proven and innovative

### Vision Statement

To serve our clients with the best service under a very good and well maintained relationship

### Mission Statement

We are responsible, accountable, respectful, effective, efficient company We promote honesty, integrity, and openness by all we do  
We encourage innovation to meet challenges  
We foster an environment of collaboration

### Why Choose Us

#### **Quality Assurance**

We assure that we prevent mistakes and defects in projects and avoiding massive breakdown within the project

#### **Reliability**

We fulfill any task we given within our expertise and always available for any new challenge our clients go through

#### **Cost Effectiveness**

We produce quality service at equivalent cost that it produces

#### **Timely Deliverance**

Delivering on time is our way to meet our customers' demands and deliver the services to the customers punctually

#### **Customer Relationship**

We have well-spoken customer responsiveness towards our clients which keeps our relationship to be more stronger and constant.

## STRUCTURAL ENGINEER

**Mr. Magakantsha Julian Raphasha**, was absolved by our company as one of our key specialist in Structural engineering together with his company JRACCE (PTY) LTD, standing as an agent call out for any project that our company is awarded by clients.

### **Educational Background:**

Msc in Bridge Engineering (Current study), University of Surrey (UK)  
BSc(Hons)Applied Science in Structural Technology, University of Pretoria  
Projects Management for Engineers, E.N Corporate University  
BTech in Structural Engineering, Tshwane University of Technology  
National Diploma in Civil Engineering, Technikon Northern Gauteng  
MS Projects, Eagle Computer Training

### **Field Experience:**

Julian Raphasha is a Professional Civil Engineer technologist; he spent most of his career with BKS (pty) ltd Bridge Department as bridge Engineer Technologist where he was involved in the design and detailing of several steel and reinforced concrete structures throughout Africa.

#### **Bridge and Structural Engineering**

Julian take pride in being part of the design team that successfully completed in not excluding the following projects : Nelson Mandela Bridge in JOHANNESBURG, Gledhow Footbridge - DURBAN, Design and Build of Nangurukuru – Mbwemkuru Road at TANZANIA, Runway of Sikhuphe

International Airport at SWAZILAND, Azezo – Metema Road upgrading project at ETHIOPA, Mhalthuze Water Buoyant Effluent Disposal scheme pipe line from st2 to ps1-SOUTH AFRICA, Zesco roads upgrade – ZAMBIA, Tamburawa WTW - NIGERIA

#### **Site Supervision**

He was then appointed as Senior Engineer Technologist (Resident Engineer) for Eskom at Open Cycle Gas Turbine Mossel bay site where he was involved in the site supervision of the following structures: Gas turbine foundations and buildings, Double storey control building, Dams, Steel structure (Stores, Diesel generator building), Storm water, Access roads and culverts, Cable and pipe trenches, Fuel Tanks and structure, Fuel treatment and forwarding structures, Fire water tanks etc.

#### **Consultant**

Julian Raphasha joint BevServ (a Coca-Cola company) as a consultant where he carry-out the design and detailing of steel structures (Warehouses, platforms, etc.), Reinforced Concrete structures including office blocks, concrete buildings for mechanical and electrical equipment's concrete hardstands etc.

### DEVELOPMENT PLANNER (TOWN PLANNER)

Mr. Gilbert Phiri, was absolved by our company as one of our key specialist as a Town development Planner together with his company Inyathi and Fraser Development Services (PTY) LTD, standing as an agent call out for any project that our company is awarded by clients.

## Companies operating under: GLOBAL CREATION

STRUCTURAL ENGINEERING JRACCE (PTY) LTD

**Registration Number** : 2012/093147/07  
**Vat Number Management** : 4650251897  
**Management** : Mr. M.J Raphasha: C.E.O

### Company Overview

JRACCE (PTY) LTD previously known as Julian Raphasha and Associate Civil Consulting Engineers cc is a multi-disciplinary engineering company. We focus on providing engineering services in the areas varying from Civil Engineering Consulting, Project Management, Construction and Management (Turn-key Solutions) in infrastructure developments.

Julian Raphasha and Associate Civil Consulting Engineers cc has been conceived in the year 1998 when the CEO Mr. M.J Raphasha and other associates took a career in civil engineering.

Having established a good engineering experience and with the need to take engineering to higher levels, it was concluded that the company that will take a lead in engineering solutions is required. Julian Raphasha and Associate Civil Consulting Engineers was then established by the 2008. Within five years of existence the company grew its turn-over over the acceptable level close-corporation (cc) to a Qualified Small Enterprise (QSE) level. This required that the company be converted from close-corporation (cc) to Propriety (PTY) Limited (LTD) company.

Julian Raphasha and Associate Civil Consulting Engineers was then successfully upgraded to JRACCE (PTY) LTD during the year 2012.

JRACCE (PTY) LTD bring excellent engineering solutions in all fields of civil engineering by providing the safest and cost-effective designs, excellent project management to ensure on time delivery of various project and high class construction supervision and management.

## JRACCE (PTY) LTD

We ensure that a well-managed, designed project is carried out through to excellent construction practice.

We embrace the culture of total quality management “value before the price” by giving all our clients value for their money in infrastructure development.

Our vision is rooted on valuing life by considering Today's as special day because is the only day we can act to influence life and the outcome of future, Leaders by doing what we say we can do, in Engineering by striving to bring our academic knowledge and well-earned experience to give Our Clients Solutions to their projects

Our Vision is to be: ***TODAY'S LEADERS IN ENGINEERING SOLUTIONS***

### Services

#### TRANSPORTATION AND ROAD INFRASTRUCTURES

Transportation and road infrastructure remain the critical infrastructure linking communities, provinces and the continent to ensure economic of development and sustainability of human civilization. This is provided in the form of local and provincial roads, high-ways, rail-ways and airports.

Transportation infrastructure is both art and Science. We acknowledge that a well-designed transportation infrastructure should possess internal harmony by providing smooth way, have the clear vision of the side's landscape and should fit well with external surroundings. It should be built to endure and provide adequate safety for passengers and goods.

JRACCE (PTY) LTD understand that for the above to be archived the understanding of pavement material science, vehicle-train-airplanes performance, geometric design (horizontal, vertical and stopping sight distances are critical), traffic flow (travel demand and traffic forecasting), and signal phasing and timing are of outer most importance to Our Clients.

We provide an excellent transportation engineering practices of peculiar nature base on the experience of our pavement and geometric designer. Our pursuit for exceptional on site quality will save our Client much resources of maintenance cost and ensure safety on users. We ensure Zero port-holes on the roads we designed within a maintenance free period.

Our services include planning and designs of rural, urban and highway transportation, rail-ways and airport infrastructure.

We provide services in not excluding the following transportation infrastructures:

- Arrangement of aerial photography to assist in route planning.
- Condition surveys, studies and investigations.
- Feasibility studies.
- Detailed Geometric Design.
- Horizontal alignment.
- Vertical alignment.
- Pavements Design.
- Design of bridges and drainage structures.
- Detail drawings and technical specifications.
- Contract documentation, Calculation and scheduling of quantities.
- Detailed cost estimates.
- Call tenders and tender evaluation. Recommendations to client on tender submissions:
- Contract administration and quality assurance management.
- Certification of claims.
- Handover certificate.
- Provide As-Build drawing at project completion.

## WATER ENGINEERING

Water remains one of the basic human needs. This covers a wide range of scope varying from water supply for consumption and surface water handling.

JRACCE (PTY) LTD understands that the success of your Water Engineering projects is highly dependent on your teams understanding and application of fluid mechanics, hydraulics and water supply theories. We have very experienced water engineers, Technologist, technicians and CAD operators who assure our clients their water engineering solutions.

We provide services in not excluding the following Water infrastructures:

- Water distribution systems and networks.
- Community water reticulation.
- Sewer reticulation.
- Reservoirs and water towers.
- Dams.

## URBAN AND RURAL DEVELOPMENT

The world continues to change rapidly, population increases and humanity continues to migrate to better the standard of living so is the need for Urban and Rural Development.

*Humanity will not go back to Stone Age and therefore current demand of basic infrastructure remains priority to Municipalities. The system include providing water fro drinking – Polluting water by using Sanitations – capturing polluted water through pipes to water treatment plants – cleaning water by purification plants – releasing to the streams which is then harvested for cleaning for consumption again. The system is inter-linked and any failure of the system can be fatal.*

JRACCE (PTY) LTD acknowledge that the solutions of meeting infrastructure demands is underpinned by proper Planning of Land, Water supply and waste disposal, drainage, surface and subsurface and housing. Lack of proper management of this infrastructure can result in fatal water born diseases and impact on the environment we live in.

We take pride in using our in-house capabilities of Civil and Chemical Engineers with the support of excellent software's to provide our clients with excellent Urban and Rural Development solutions.

We provide services in not excluding the following:

- Community water reticulation
- Sewer reticulation design
- Assessment of Existing Waste Water Treatment plant for compliance and capacity analysis Institutional and social development (Schools and Civic Centers) Housing

## **BUILDING ENGINEERING, INDUSTRIAL DEVELOPMENT PROJECTS, MINING INFRASTRUCTURE PROJECTS AND RESIDENTIAL DEVELOPMENT**

Building engineering includes a wide range of developments intended for human occupancy, sheltering of equipment's and storage of goods.

JRACCE (PTY) LTD provides excellent building engineering practices. That include designs new buildings, structural assessments and upgrades existing building.

We brings the experience of material science that covers a wide area of concrete, steel, composite etc. We have very experienced structural engineers, Technologist, technicians and CAD operators who assure our clients the most safest, economical and of great aesthetical appeal structural design.

We provide services in not excluding the following structures:

- High Rise Buildings for the following purposes
- Commercial, Offices blocks and Residential
- Special Purpose Buildings
- Educational, Recreational, Hospital and Health Care
- Shopping Centres
- Hotels and Resort Developments
- Car Parks
- Industrial Buildings and Warehouses
- Bridges Commercial low and high rise buildings
- Steel Structures

## **GEOTECHNICAL ENGINEERING**

JRACCE provide an excellent geotechnical solution for all your deep and shallow foundations. We take pride in using our in-house capabilities with the support of excellent software's to provide our clients with excellent engineering solutions in not excluding the following geotechnical engineering practice:

- Recommendation on soil testing method for specific site condition
- Determining your design and allowable bearing capacities
- Analysis the foundation settlements and their impact
- Recommendation of soil improvement
- Special footing design
- Mat Foundations
- Retaining walls design and stability checks
- Piles design

## POWER STATIONS INFRASTRUCTURE

Power station infrastructure requires the understanding of deferent combination of various disciplines on Civil Engineering. The most dominant aspect is mainly concrete and steel structures design of turbine house, cooling towers, smoke stacks and common duck etc.

JRACCE (PTY) LTD have employees who were part of the construction of new gas turbine plant and have worked in existing power station environment. We do acknowledge that newly build power station programs has not long started in RSA and hence little experience in this area. We continue to partner

with well experience companies to ensure skills transfer while adding value in areas we have experience on.

We provide services in not excluding the following structures:

- Life expectancy assessment for Concrete and Steel Structure.
- Design of concrete structures: Cooling towers, Smoke Sacks and foundations for Turbines, Conveyors and Pumps.
- Buildings.
- Ash Dams and Ash Dumps.
- Coal Stockyards.
- Dams.
- Roads and Culverts.
- Valve Pits.
- Staircases and Access platforms.
- Fabric Filter Plants Structures.
- Coal Staithes.
- Workshop buildings.
- Conveyor belt Structures.
- Water and Sewer treatment Plants.
- Storm Water Management.
- Civil maintenance strategies.

## BRIDGE STRUCTURES

JRACCE (PTY) LTD provides an excellent bridge designs solutions for rural roads, high-ways, pedestrians, pipe and Railways Bridge structure etc. We take pride in using our in-house capabilities with the support of excellent software's to provide our clients with excellent engineering solutions in not excluding the following bridge structures:

- Pipe, Box and skew culverts.
- Rigid frame bridges.
- Tee beam and slab bridge decks.
- Composite bridges.
- Plate girders.
- Box girders.
- Balanced Cantilever bridges.
- Steel trussed bridges.
- Pre-stressed Concrete bridges.
- Continuous bridges.
- Curved bridge decks.
- Bridge piers and abutments.
- Bridge bearings.
- Bridge foundation including piles.

## BRIDGE DURABILITY

- Durability overview
- Monitoring and testing of structures
- Structural assessment and material, and repair methods Inspection, assessment and strengthening.

## PROJECT MANAGEMENT AND CONSTRUCTION SUPERVISION

JRACCE (PTY) LTD provide high level project management by overseeing all aspects of activities in pursuit our client project goals, allocating resources, managing budgets, and coordinating overall effects to achieve our clients specific desired results.

We provide services in not excluding the following:

- Project Process Flow Diagrams.
- Project Integration Management.
- Project Scope Management.
- Scope Planning, Defining, Verification and Control.
- Project Time Management.
- Schedule Development and Control.
- Project Cost Management.
- Cost Estimating, Budgeting and Cost Control.
- Project Quality Management.
- Quality Planning, Assurance and Control.
- Project Resource Management.
- Resource Planning, Development and Management.
- Project Communication Management.
- Information Distribution and Performance Reporting.
- Project Risk Management.
- Risk Management Planning.
- Risk Identification.
- Qualitative Risk Analysis.
- Quantitative Risk Analysis.
- Risk Monitoring and Control.
- Project Procurement Management.

## **ENVIRONMENTAL MANAGEMENT AND HEALTH AND SAFETY PROJECTS**

JRACCE provide an excellent environmental management, we encourage our clients to comply with environmental regulations and recommendations. We have a clear knowledge and understanding of legislature requirements so we can assist with excellent environmental management.

We offer the following services:

- Environmental impact assessments.
- Environmental monitoring.
- Environmental audits.
- Environmental risk assessment.
- Borrow pit application and closure with DME.
- Water license application with DWAF Waste management.
- Health and Safety plans.

**Projects completed**

## SOCIAL FACILITATOR

### Athimthende Development Services

#### Company Overview

Athimthende Development Services is a specialized multi-disciplinary consultancy firm that offer practical infrastructure advisory and developmental planning solutions to create financially viable companies, institutions and municipalities to achieve a sustainable development impact.

Athimthende Development Services Team has years of experience spanning over 30 years combined. The experience of the team is widespread over various sectors including government, private sector and civil society. This widespread experience enables the team to develop custom made solutions that are designed to respond appropriately to the unique needs of every client.

#### Services and Solutions

- Turnaround Solutions
- Municipal Support/ Interventions
- Corporate and Project finance
- Business review and process Engineering
- IT/Financial systems
- Engineering services
- Skills, Training and development
- Preparation of master plans
- Feasibility studies, concept and detailed designs
- Budgeting, costing and quantity surveying
- Project management and PMU solutions
- Preparation of terms of references, tender documents, procurement strategies and advisory

**DEVELOPMENT PLANNER**

**Inyathi and Fraser Development Services (Pty) Ltd**

**Company Overview**

Inyathi and Fraser Development Services (Pty) Ltd is a multi-disciplinary professional entity which renders professional services from town and regional planning to development and other activities/functions as outlined in the Memorandum of Incorporation and Articles of Association implementation with a view to eventually achieve tangible development outcomes. We apply ourselves with due professional diligence in delivering services to our clients.

Inyathi and Fraser Development Services (Pty) Ltd adopts a strategic approach to development planning, and seeks to create environments that improve and enhance quality of life while maintaining balance between development and conservation of natural resource. Our approach to service delivery is that development is achievable through working partnerships by working with and through others. At the very core of development processes is the participation of all relevant stakeholders especially bearing in mind that it is beneficiaries (end-users) who know best what they want. Inyathi and Fraser Development Services (Pty) Ltd renders its services in a highly professional manner. The company subscribes to the planning and development principles that underpins development policies and legislation in South Africa, particularly those that gives rise to the following outcomes:

- Integrated development.
- Sustainable development.
- Economically generative environments.
- Socially inclusive environments.
- People centred development.

### Services

Inyathi and Fraser Development Services (Pty) Ltd was founded by the Project Team Leader Mr Gilbert Phiri who has expertise in a range of planning and development activities, particularly the following:

- Community Development
- Social Facilitation
- Project Conception, Management and Implementation
- Business Plan/Case Preparation
- Project Funding Sourcing
- Master Planning
- Spatial Development Framework Planning
- Local Area Development Planning
- Precinct Planning

- Urban Design
- Urban/Township Renewal Regeneration
- Integrated Development Planning
- Local Economic Development
- Housing Sector Planning and Housing development
- Project development, packaging and management
- Other activities and functions
- Research and evaluation
- Municipal support and capacity building

**Projects Completed**

**Project Name** : NDPG Capital Grant  
**Type of Service** : Programme

## Non-Profit Organization

Leseding Car Givers NPO

DSD Registration No	: 020 -063 NPO
CIPC Registrati	: 9624385184
HWSETA Accreditation No	: HW591PA156594
TAX No	: 9448688151
VAT	: 4530263021

### COMPANY OVERVIEW

**Leseding Car Givers NPO** with registration number: 020-063 was established in 2015, which later formed partnership with **Mpumhi Haeven For Women** with registration number 093-284- NGO which was established in the year 2011, together they have worked on several projects to assist one another in order to deliver excellency.

LCG operates primarily in under-privileged communities with more emphasis given to rural areas. The organization's development model is designed according to a needs assessment and factors in, the sustainability of interventions.

In line with LCG's objective of sustainability, the need to restructure the funding model has become self-evident. The current funding model is inconsistent and poses cash-flow challenges for the organisation. It is with the funding model gap that LCG has identified your organization as a natural funding/ Lending partner to help in the extension of the business services. LCG's plan is to implement an income generating project that will sustain the organisation for its lifespan period.

### Staff Profile

#### Statement of training funding needs

The organisation is working in partnership with several Private companies, CBO, NGO, FBO and the community at large, whereby different needs and gaps has been identified on the health and welfare sector services. The CBO's, NGO's and FBO's are the key and field workers for the Department of Health to reach their services to the community and hard to reach areas. There is a great need and potential for organisation that are serving the community with health related services to get their workers to be trained on Community Health Work Level 4 qualification which will enable them to provide services with the correct standard and of quality.

**CONSTRUCTION AND CIVIL ENGINEERING**

**BASADI CIVIL CONTSTRUCTION**

Basadi Civil Construction is a business initiative which came as a result of two woman, Dimakatso Trinity Mashego and Nomshado Madonsela, who came together to form a general building and civil construction initiative. The aim and objective is to be a service provider to the various communities in need thereof as well as to provide the unemployed people with job opportunities.

**SERVICES**

**Bricks**

The simple brick. There's not much to it. Or so you might think. We beg to differ. The high thermal mass found in every one of our bricks naturally helps moderate indoor temperatures and thereby significantly reducing the need for energy that's used up by artificial heating and cooling systems. In addition, our bricks eliminates the so-called carbon debt associated with a lifetime of maintenance. Our bricks are inert and do not release volatile organic compounds, which are potentially harmful to the environment, Our capacity allow us to produce up to 20 000 bricks per day.

**Transport**

Anyone can put a few trucks on the road, but it takes experience, knowledge and an extensive fleet to truly be prepared for every customer requirements. Basadi Civil Constructions has it all, and we've proven our ability to serve you well time after time. No matter what you need hauled, Basadi Civil Construction has probably already hauled it by the ton. From crushed stone and bulk commodities, to solid waste and contaminated soil, we know exactly how to get it done. General contractors as well as many industrial, commercial and municipal customers have come to rely on us for a variety of transportation and environmental services. Basadi Civil Constructions owns and carefully maintains every vehicle.

The most up-to-date GPS technology is standard equipment in every one, illustrating our commitment to dependable scheduling and prompt customer service. And that service commitment extends to our offices too, where your call will be always be answered by a courteous, knowledge person - not a machine. Call soon, and find out for yourself.

### Services

We specialize in planning, coordinating, and executing project according to specific requirements and constraints. We perform some or all of the activities related to project work, from conceptualization to completion, we offer mentorship on how to tender or bid for projects under the government and private sector then assist them with initiating, planning, executing, monitoring and controlling the project at hand.

### The Market

This is the imperfect competition market structure that enforces the situation in a market in which elements of monopoly allow individual producers or consumers to exercise some control over the market, our market is huge and the gaps in the market as the business has too many difficulties and requires a competitive capacity in the market, we believe we will dominate the share of the market in this industry.

### The Opportunity

Most construction companies struggle in terms of handling massive project as a result of not having relevant resources and capacity, they cannot afford to hire well qualified and skilled engineers to manage their projects which lead to failure to deliver the best outcomes of the projects as requested by their clients.

SME struggle to survive in the market because of incompetency.

### The Solution

We have young qualified, innovative, goal driven and skilled staff to provide our clients the best service, we first start by making sure that our clients are marketable and mentor them into successfully qualifying for contracts, then we assist them by providing them with our team to complete the project at hand.

We believe the best way to serve and keep clients satisfied is by offering outstanding service. Our main focus is on the SME Small Medium Enterprises to assist them grow into larger firms

Mission Statement

Global creation is dedicated to delivering effective, efficient, respectful services with integrity and accountability using both proven and innovative

Vision Statement

To serve our clients with the best service under a very good and well maintained relationship

Mission Statement

We are responsible, accountable, respectful, effective, efficient company We promote honesty, integrity, and openness by all we do  
We encourage innovation to meet challenges  
We foster an environment of collaboration

Why Choose Us

**Quality Assurance**

We assure that we prevent mistakes and defects in projects and avoiding massive breakdown within the project

**Reliability**

We fulfill any task we given within our expertise and always available for any new challenge our clients go through

**Cost Effectiveness**

We produce quality service at equivalent cost that it produces

**Timely Deliverance**

Delivering on time is our way to meet our customers' demands and deliver the services to the customers punctually

**Customer Relationship**

We have well-spoken customer responsiveness towards our clients which keeps our relationship to be more stronger and constant.

Conclusion

We are committed to conduct our business activities with our clients, our employees and our suppliers with integrity and respect. We take client's satisfaction seriously and we are committed to being a leader in providing our clients with quality and cost-efficient services.

We believe it is our responsibility to bring added value to both our clients and suppliers by introducing innovative and cost-effective ideas while providing reliable performance. We believe that our suppliers are partners who share in our goals of excellence. To this end we are both committed to deliver quality services. We respect the individuality of each employee and are committed to providing an environment which encourages productivity, creativity and teamwork and which recognizes and rewards individual contribution.

**Thank You**
