What We Do

Native Circuit Elements (NCE) is a consumer electronics assessment and repair company. We specialise in repairs of audio-visual appliances, kitchen appliances, and computers of all makes. We also specialise in data recovery, and software related faults.

NCE was created to bridge the gap between the service expected and the service delivered. We put emphasis on speed and quality of repairs.

Coverage

We primarily operate in Johannesburg metro and West Rand areas, however, we will consider requests outside our areas of operation on a per-case basis.

How We Do it

We use drivers to collect appliances for repair. This allows the technicians more time to solely focus on appliances repairs in a workshop environment. In the case that an assessment or repair on site is required, an appointment can be scheduled for R550. Outside our areas of operation, additional charges may apply.
