

Apex Mechanical Tools is a mechanical and electrical engineering company based in South Africa. We offer a comprehensive range of services to domestic, commercial, and industrial clients. Our focus is on providing the necessary skills and expertise to help industries compete in the global market.

Research and development are at the core of our operations as we strive to keep up with the evolving demands of machinery. We prioritize high levels of quality and serve clients throughout South Africa. Our team consists of highly qualified technicians who are extensively trained in their respective fields. They possess the analytical ability to deliver effective and appropriate engineering solutions to various problems.

At Apex Mechanical Tools, we adhere to principles of quality and professional engineering standards. We value trust in our relationships with clients and the various departments and individuals we collaborate with. We aim to maintain a strong reputation in the industry by providing exceptional services.

Our company has recently expanded its operational capacity with the introduction of advanced technologies. We have installed a Robotic PTA welding system, along with additional heavy engineering lathes and boring machines. This expansion allows us to offer a unique hard facing and machining service to both new and existing customers. Our commitment to quality and service remains unwavering.
