LOSS PROGRAMS.

MIC INJECTIONS

Our special Lipotropic Injections is specifically formulated to facilitate weight loss

How this works?

The MIC shot contains essential amino acids that boost the liver and the gallbladder's function to **decreases fat deposits and speeds up your metabolism** to facilitate adipose tissue breakdown. The nutrients within our special shot play an important role in the usage of fat.

Our Results

MIC injection has been shown to produce an additional weight loss of **1-2 pounds weekly** when administered once or twice in combination with an adequate diet.
