

Asphalt Group

Stronger Together!

Our Story

The Asphalt Group brings together Asphalt Construction Services (ACS), Next Level Projects, and TurboVision, delivering specialised solutions across civil infrastructure, road building, driveways, parking areas, residential and commercial construction, asphalt rejuvenation, and surface maintenance.

Our divisions combine proven expertise, experienced teams, quality workmanship, and practical execution to deliver reliable solutions built for lasting performance.

We believe successful projects require more than technical capability — they require careful planning, expertise, and a commitment to doing the job properly from start to finish.

26 Years

Industry experience and proven project delivery

Three Divisions

Asphalt Construction Services (ACS)
· TurboVision · Next Level Projects

SABS Approved / Specified Materials

We use SABS-approved or specified materials wherever possible, ensuring quality, durability, and compliance across our projects.

Three Companies. One Group.

Asphalt Construction Services (ACS)

Roads • Asphalt • Civils

We build, rehabilitate, and maintain roads, parking areas, residential driveways, and paved surfaces. From site preparation and earthworks to professional asphalt and bitumen paving, we deliver durable solutions for residential, commercial, and infrastructure projects.

When roads fail, we address more than the surface; we repair the foundation beneath it. Combining civil expertise with quality paving and experienced execution, we deliver reliable road solutions built for safety, performance, and long-term durability.

TurboVision

Seal • Restore • Maintain

TurboVision protects and extends the life of existing roads, driveways and parking areas through specialised Slurry Seal, TurboSeal, bitumen rejuvenation and surface treatments.

Our rapid tar repairs fix potholes, seal cracks and protect against moisture and sun damage, helping prevent costly replacements. Early maintenance saves time and money — keeping your asphalt stronger, longer.

Next Level Projects

Building • Construction • Development

Next Level Projects is our dedicated building division, delivering residential and commercial projects from blueprint to completion. We manage the full construction process, from structural brickwork and concrete to alterations, renovations, interior and exterior finishes.

With experienced project management, we ensure quality craftsmanship, safety, and on-time delivery, providing clients with one reliable team to manage every stage of the build.

Asphalt Construction Services (ACS)

Our Expertise

→ Asphalt Paving

Machine and hand asphalt paving with 26 years of experience

→ Roads & Infrastructure

Private roads, Industrial areas, driveways, traffic junctions, sidewalks, speedhumps, kerbs & retaining walls

→ Industrial & Residential Paving

Private roads, Industrial areas, driveways, traffic junctions, sidewalks, speedhumps, kerbs & retaining walls

→ Airfields

Construction and premix of small airfields, taxiways & runways

→ Civil & Earthworks

Bulk earthworks, excavation, water & sewer pipelines, housing infrastructure

Our Expertise

→ Asphalt Maintenance

Upgrading & Rehabilitation of deteriorated areas.

→ Patches and/or Pothole Repairs

Professional repairs to damaged asphalt surfaces and restoring potholes.

→ Crack Sealing

Sealing cracks in asphalt surfaces prevents water penetration and slows further deterioration, extending the life of the asphalt area.

→ Slurry Seal

A protective surface treatment that seals and rejuvenates existing asphalt.

→ Turbo Seal

An in-house designed seal treatment that seals, protects and rejuvenates existing asphalt.

Next Level Projects

Our Expertise

- **Residential & Commercial Building**
Comprehensive construction solutions for residential and commercial projects.
- **Alterations & Renovations**
Transforming existing properties through structural alterations, upgrades, extensions and complete renovations.
- **Project Management**
Professional project management ensuring every stage of construction is coordinated, controlled and delivered to specification.
- **Structural & Building Works**
Construction of foundations, concrete structures, and brickwork.
- **Finishes & External Works**
Complete interior and exterior finishing solutions, including plastering, painting, flooring, paving and external improvements.

Asphalt Construction Services (ACS)

Flagship Projects

De Hoop Nature Reserve

Road construction and infrastructure development within the reserve.

Tygerberg Hospital

Full road rehabilitation and new asphalt surfacing on hospital grounds.

Neethlingshof Wine Estate

Road paving and kerb installation at the Stellenbosch wine estate.

Tiger Brands, Paarl

Comprehensive site development, including bulk earthworks, stormwater, retention pond and interlocking concrete paving.

More Projects

BP Airport Industria

Concrete platform for diesel pumps, premix surfacing, and road markings.

Sasol Melkbosstrand

Full LPG vessel upgrade including underground tank installation, concrete casting, kerbs, and interlocking paving.

Stellenbosch Airfield

Construction and premix of taxiways and runway surfaces.

Milnerton Golf Club

Excavation and construction of interlocking paving parking area, including kerbs, manholes, etc.

Asphalt Construction Services (ACS)

Infrastructure & Paving

Wolwerivier ECD Centre

Full infrastructure development including artificial turf, play areas, paved walkways, and modular building platforms.

Residential & Industrial Paving

From private driveways to large industrial parking areas — we specialize in clay bricks, bond pavers, and industrial interlockers with a wide selection of patterns.

Retention Ponds & Private Roads

Complete civil earthworks, stormwater management, and road layout for residential and commercial developments.

Asphalt Maintenance & Surfacing

Patch & Pothole Repair

Removal, stabilization, re-compaction, and SABS-approved wearing course application.

Slurry Seal / TurboSeal

Bitumen emulsion blend applied over good-condition premix. Lifespan: 5–8 years.

Next Level Projects

Custom Design & Build

Additions & Renovations

Home extensions, alterations, and full renovations — custom-designed to match your lifestyle and budget.

Bund Wall Construction

Specialized civil construction of bund walls for industrial and environmental compliance.

Custom Design & Build

From concept to completion — we handle design, planning, and construction for unique projects.
